every month

A dark gray world map is centered in the background. Numerous small, light blue circular pins are scattered across the map, indicating global locations. There is a high concentration of pins in North America, particularly in the United States and Canada. Other significant clusters are visible in Europe, Asia (specifically in China and Japan), and Australia. Pins are also more sparsely distributed across South America, Africa, and the Middle East.

The screenshot displays the Microsoft Power Apps 'Application Review' interface. The browser address bar shows the URL: <https://make.powerapps.com/e/7ad82e35-9bb8-ea1f-809e-bbbe1a9fb619/s/00000001-0000-0000-0001-000000000009b/app/edit/7b92428b-dc2e...>. The interface includes a left-hand navigation pane with a 'Pages' section containing a search bar, 'Add page', and a list of app components: 'App', 'Students', 'Students form', 'Students view' (highlighted), 'Students and Ratings', 'Students and Ratings form', 'Students and Ratings view', 'Dashboards', 'GPA & ratings', and 'Get Started'. The main workspace shows a table titled 'Active Students' with columns for 'First name', 'Last name', and 'GPA'. The table contains the following data:

First name	Last name	GPA
Anna	Aljanaki	4.0
Monica	Rays	4.0
Sigrún	Kristjánsd...	3.6
Joanna	Krawczyk	3.6
Komil	Amonzoda	3.6

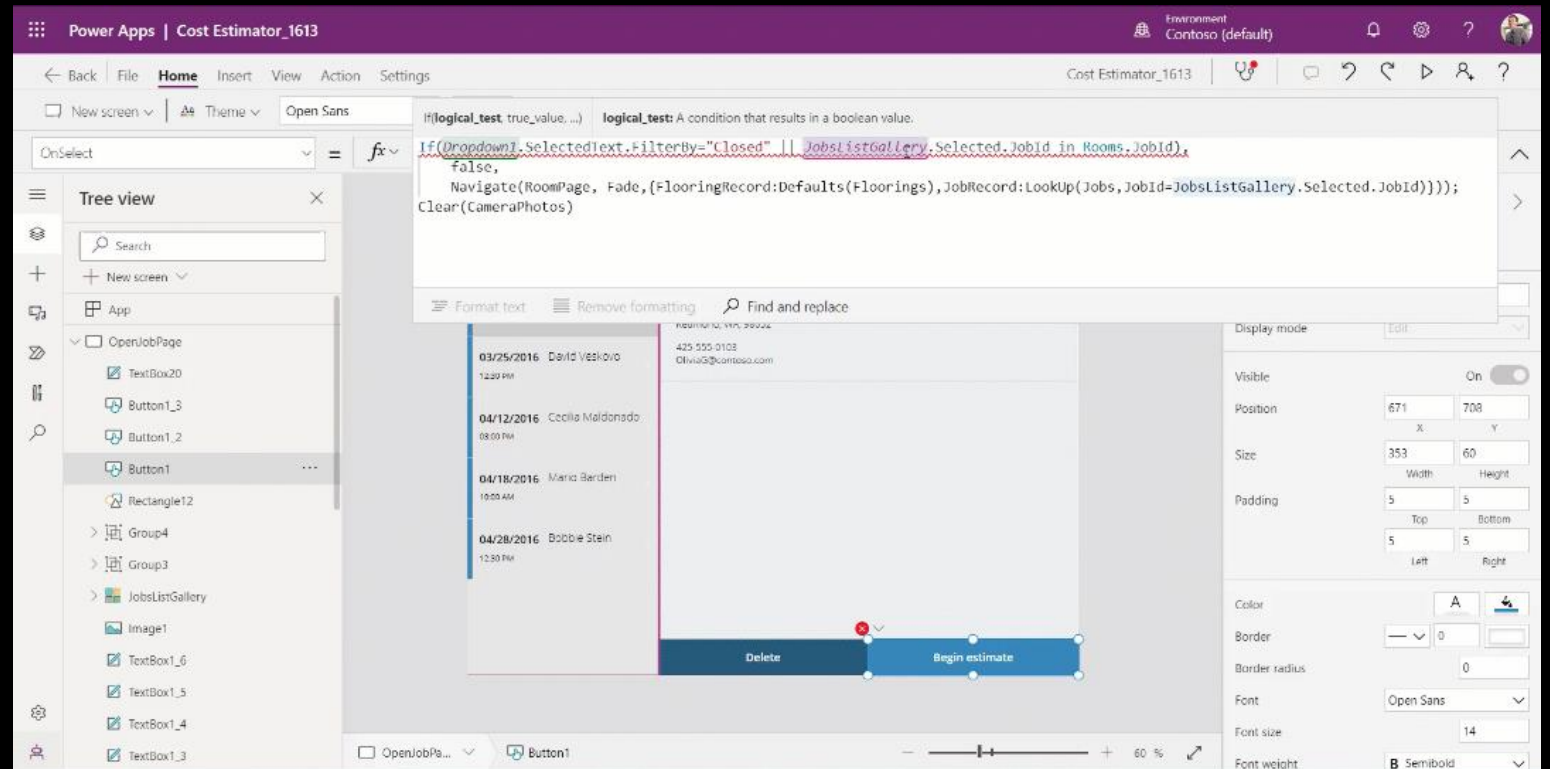

Below the table, it indicates '1 - 50 of 102' and 'Page 1'. A right-hand pane titled 'Comments' shows a comment from 'Luca Machetti' (@Miti) dated September 19, 2022, at 12:38 PM, stating: 'What do you think of this so far? I was thinking a dashboard would help reviewers see trends across applicants'. The interface also features a 'Students view' sidebar and a 'Comments' section with a 'New' button. The bottom status bar shows 'Responsive (630 x 441)' and a zoom level of '100 %'. The Windows taskbar at the bottom indicates the time is 3:10 PM on 9/19/2022.

Power Platform Visual Studio extensions

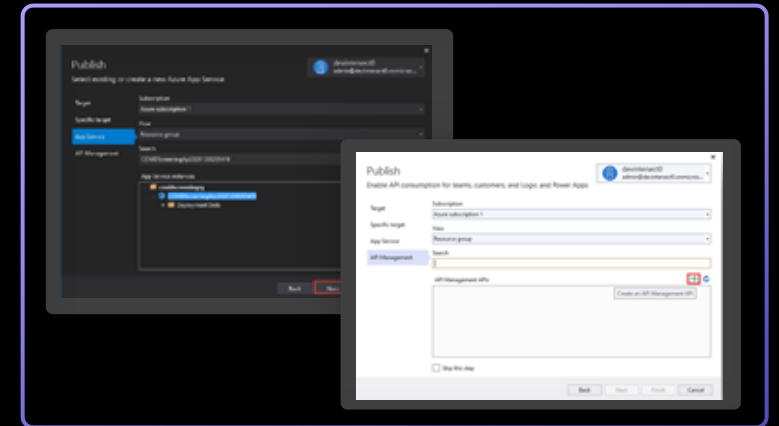

Unlock the power of Visual Studio and Visual Studio Code with Power Platform

Extend directly from VS Code
The VS Code extension for Power Platform enables js / ts extensibility

Configure portals using VS Code
The VS Code extension for Power Apps portals adds CSS, HTML, and ts/js customization

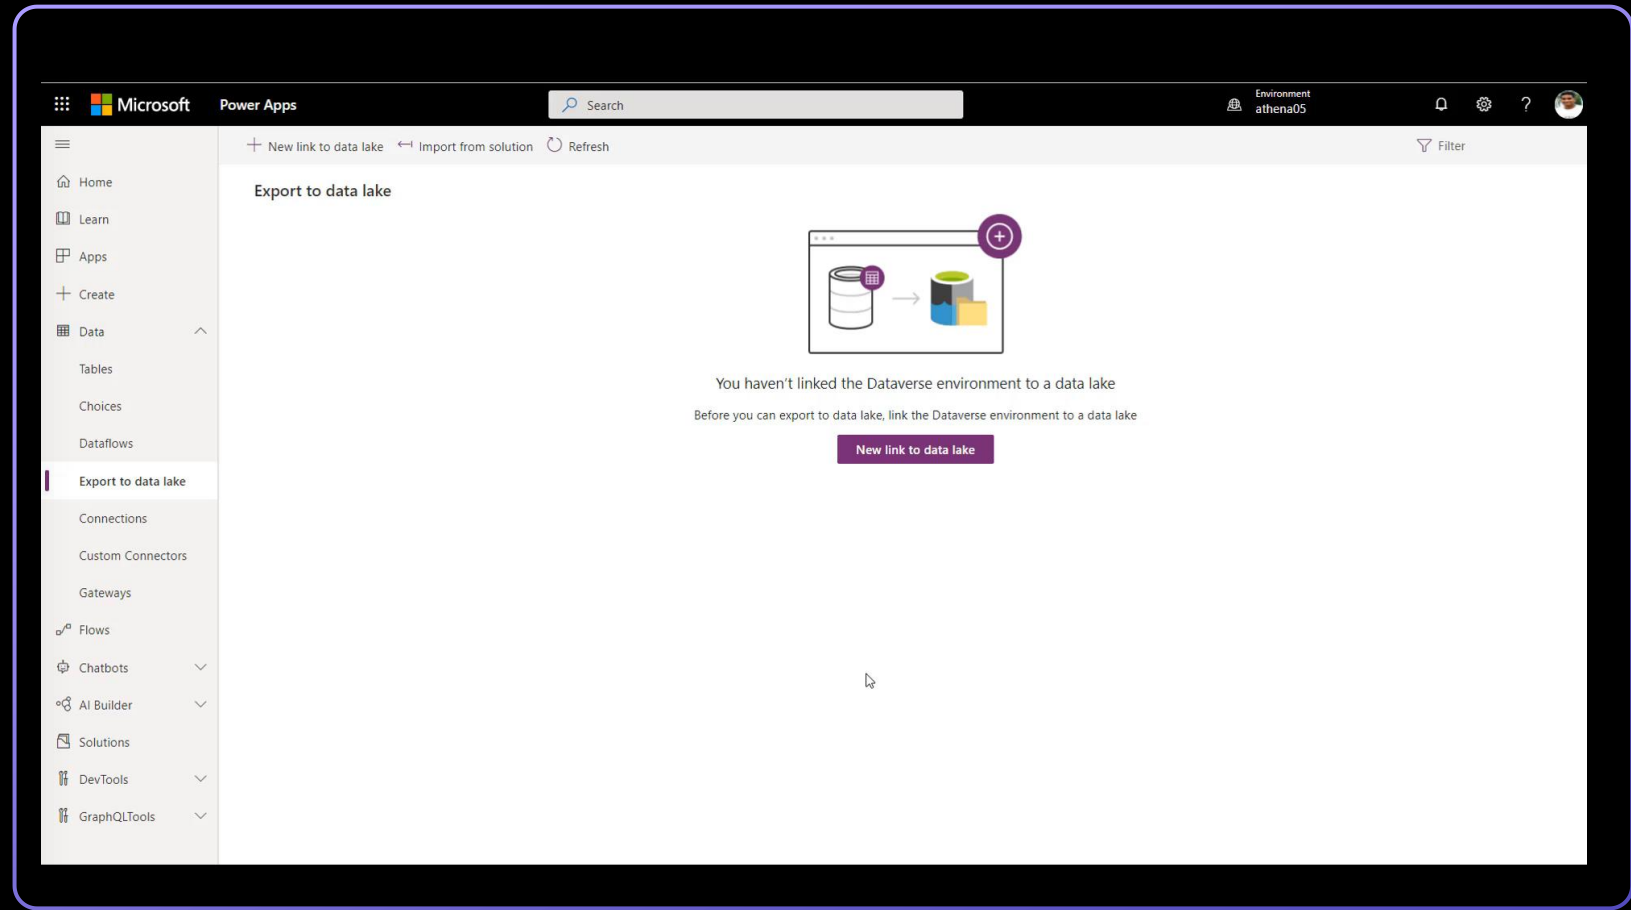

Seamlessly publish your API
The Visual Studio extension can publish APIs in Azure API management while deploying a Power Platform connector.

Synapse Link for the Power Platform

Bridges apps and Synapse

- One click configuration
- Real-time replication from Dataverse to a Synapse workspace
- Carries Common Data Model format and metadata from Dataverse to Synapse
- Supports all transactional apps built on Dataverse (Power Apps, Dynamics 365, Project, Teams Approvals, etc.)

Power Platform Pipelines

Built-in deployment pipelines reduce friction, deliver more visibility, and simplify collaboration

Coming in Nov

Configure deployments without leaving the low code experience

Validates dependencies, what-if deployments, and built-in audit trail covering all activities

Reduce friction and improve collaboration for fusion teams

The screenshot displays the Power Apps 'Overview: Contoso' page. The left sidebar shows navigation options: 'Back to solutions', 'Overview' (selected), 'Objects', 'History', and 'Deployment pipeline...'. The main content area is divided into three sections: 'Details', 'Solution status', and 'Dataverse search'. The 'Details' section shows a table with solution metadata. The 'Solution status' section indicates that the solution checker hasn't been run. The 'Dataverse search' section provides information on search index usage. Below these sections is a table of 'Recently modified objects'.

Microsoft Power Platform

Review the digest on Managed Environments for the week of June 11, 2022

See all analytics >

Here's what happened in the 4 Managed Environments in the last month:

52 Active apps	12 Active flows	376 Active app users
-------------------	--------------------	-------------------------

Consider cleaning these up

These apps haven't run in a while. For organizational hygiene and security, consider contacting the owners to update or remove them.

App	Environment	Last launch*
App1 647	Environment1	October 31, 2021
App2 482	Environment2	November 11, 2021

The Power Platform admin center is the place to manage users, environments, policies, and more.

Power Up

Program benefits

On successful completion of the program, you'll help uncover business problems where technology can benefit the daily operations for any organization. Additionally, you'll use Microsoft Power Platform to [analyze data](#), [build solutions](#), [automate processes](#), and [create intelligent chatbots](#).

Learn with a guided curriculum

Discover new skills with interactive learning paths and hands-on labs, and you can attend instructor-led webinars.

Get certification vouchers

Program participants will be awarded vouchers to register for Microsoft Power Platform certification exams.

Receive recognition

By completing the learning paths, you'll be awarded community-recognized badges to help you advance or find new career opportunities.

Be part of a community

You'll have support along the way and will have access to experts, peers, and local events.

New Microsoft Learn: Think like a Maker series

This learning path will guide you through the key decisions that are made throughout the entire process. It will focus on the “**why’s**” behind the “how’s.”

- **Plan** *your project like a pro*
- **Design** *your project like a pro*
- **Make** *your app like a pro*
- **Test** *your app like a pro*
- **Deploy and refine** *your app like a pro*

Next steps

Go “all in”
with low-code
